Memphis & Little Rock Railroad,

what would arkness specially have done had it not been for the arrangements of this road? Not only Memphis, but the tributary east would have been comparely closed. This speaks to commercial me especially volumes in ired. This should be remembered. Her rates have always been extremely liberal, and this has indeed browen to be a great benefit to this section. While we may deplore the heightsmess of other lines working west from here the action of this road deserves especial praise. This road claims to be a friend of Arkanson. Truly has she carried out her claim. Build-

pairing anything in this line.

SIDNEY COOK.
